ON THE SOUTH

Here is a vast country with the best climate in the world, with conditions of health which are absolutely unparalleled, with vast forests untouched, with enormous veins of coal and iron, which yet have not been known anything beyond their original conditions; with soil that, under proper cultivation, for little capital can support a tremendous population; with conditions in the atmosphere for comfortable living winter and summer which exist nowhere else in the country; and that is to be the attraction for the young men who go out from the farms to seek settlement, and not by immigration from abroad, for I do not think they will go that way—but by the internal immigration from our own country it is to become in time as prosperous as any other section of the country and as prosperous by a purely American development.

THE GLADE ADDITION.

One of the prettiest building sites in the city.

One of the most valuable additions that has been laid out to the city is the Glade property.

This is situated just east of Glade Creek and immediately on the rim of my line. The fact that it has this running through it makes it exceedingly more valuable, as it brings it in close proximity to the center of the city. The fare over the line is only five cents, and places it within the reach of all who attend church, do the marketing and every thing of that sort in this part of the city. By having a home in this addition a person can enjoy all the pleasures of a suburban residence and yet get the benefits of city conveniences.

The addition is being laid out with wide streets and avenues, and building sites are rapidly being sold. It is well drained and therefore very healthy.

A company has been organized to erect a water works plant and the reservoir will probably be erected at an early date. When this is done this section can be supplied with the clear fluid from the Smith spring, which is only a short distance away. A system of sewerage is to be inaugurated and the sanitary condition improved, though this is hardly necessary, as sickness is almost unknown.

The view from the Glade adds to it one of the finest to be obtained anywhere in this section. Tall mountain peaks, the Roanoke river, valleys and extensive forests are all in full view and form a picture that is very beautiful.

One of the best things about this property is the easy terms on which it can be purchased. Any one can save a few dollars a week from his salary and the lots can be secured as cheap as a few dollars a week, and will almost be sufficient to cover it.

The agents for the company are Messrs. W. M. Yager & Co., of South Jefferson street, one of our most enterprising real estate firms. The property is selling very rapidly, so persons contemplating purchasing had better give them a call at once. Transportation is furnished over the dummy line for those who wish to look at the property.

EAST END ADDITION.

Desirability of and Demands for Lots There.

As the summer advances, much activity in building operations is noticed, and many new houses are in process of construction. This activity makes the real estate market much firmer, and agents are correspondingly happy. Simmons & Co. have been doing a rushing business, one of the best since the firm was established. The East End property is changing hands very rapidly, and many new houses will be erected this season.

Among the prominent additions to the East End, is that of the Oakes Ridge Land Company. The site lies just east of Belmont and south of the East Side Land Company's property and adjoins the farm of Messrs. George Taylor and G. V. Carr.

It offers every inducement as a place of residence. It is removed from the business portion of the city and therefore gives a quiet, suburban home, while at the same time it is near the dummy line and therefore quite convenient to the city.

The land is high and dry and has just enough slope to give it good drainage. Gas and water mains are being put in and new streets are being laid out. Every thing is propitious and it is destined to take its proper place in the front rank. It is located near the furnace, rolling mill, bridge works and the machine works and offers, therefore, greater convenience to the workingman, as it is near his work. A number of neat cottages are going up and others have been contracted for.

James S. Simmons & Co., are agents for the company, and they can give good bargains. The property is going rapidly, and if you want to obtain a good bargain, call on them at once. The prices for the lots are low and the terms easy, so every man can own his home.
